Subject Index

Volume 72, January–June 1993

A

[1-^{11}C]Acetate
Recovery of Regional Contractile Function and Oxidative Metabolism in Stunned Myocardium Induced by 1-Hour Circumflex Coronary Artery Stenosis in Chronically Instrumented Dogs, 901

Acetylcholine
Nitric Oxide Mediates Vasodilatation in Response to Activation of *N*-Methyl-D-Aspartate Receptors in Brain, 476

Acidic fibroblast growth factor
Acidic Fibroblast Growth Factor and Heart Development: Role in Myocyte Proliferation and Capillary Angiogenesis, 7

Acidosis
Dissociation Between Cellular K^+ Loss, Reduction in Repolarization Time, and Tissue ATP Levels During Myocardial Hypoxia and Ischemia, 560

α-Actin
Antithetical Accumulation of Myosin Heavy Chain but Not α-Actin mRNA Isoforms During Early Stages of Pressure-Overload–Induced Rat Cardiac Hypertrophy, 857
Smooth and Skeletal Muscle Actin Are Mechanically Indistinguishable in the In Vitro Motility Assay, 219

Action potential
The Effect of Exchanger Inhibitory Peptide (XIP) on Sodium–Calcium Exchange Current in Guinea Pig Ventricular Cells, 497

Action potential duration
Background Potassium Current Active During the Plateau of the Action Potential in Guinea Pig Ventricular Myocytes, 890

Action potential repolarization
Background Potassium Current Active During the Plateau of the Action Potential in Guinea Pig Ventricular Myocytes, 890

Activation determination
In Vivo Estimation of Cardiac Transmembrane Current, 424

Activation patterns
Epicardial Mapping of Ventricular Defibrillation With Monophasic and Biphasic Shocks in Dogs, 145

Acute renal failure
Physiological pH: Effects on Posthypoxic Proximal Tubular Injury, 837

Adenosine
A_1-Adenosine Receptor–Mediated Inhibition of Isoproterenol-Stimulated Protein Phosphorylation in Ventricular Myocytes: Evidence Against a cAMP-Dependent Effect, 65
Coronary Pressure–Flow Relation in Left Ventricular Hypertrophy: Importance of Changes in Back Pressure Versus Changes in Minimum Resistance, 579
Selective A_2-Adenosine Receptor Agonists Do Not Alter Action Potential Duration, Twitch Shortening, or cAMP Accumulation in Guinea Pig, Rat, or Rabbit Isolated Ventricular Myocytes, 194

Adenovirus
In Vivo Gene Transfer and Expression in Normal Uninjured Blood Vessels Using Replication-Deficient Recombinant Adenovirus Vectors, 1132

Adenylyl cyclase
Selective A_2-Adenosine Receptor Agonists Do Not Alter Action Potential Duration, Twitch Shortening, or cAMP Accumulation in Guinea Pig, Rat, or Rabbit Isolated Ventricular Myocytes, 194

ADP
Altered Vascular Responses to Platelets From Hypercholesterolemic Humans, 737
Platelets Protect Against Myocardial Dysfunction and Injury Induced by Ischemia and Reperfusion in Isolated Rat Hearts, 1181

α_2-Adrenergic receptor
Mechanisms of Signal Transduction During α_2-Adrenergic Receptor–Mediated Contraction of Vascular Smooth Muscle, 778

β-Adrenergic receptors
Acetylcholine Reversal of Isoproterenol-Stimulated Sodium Currents in Rabbit Ventricular Myocytes, 517

β-Adrenergic stimulation
Isoprenaline Stimulates Gene Transcription of the Inhibitory G Protein α-Subunit $G_{i\alpha\text{-}2}$ in Rat Heart, 696
Regulation of Magnesium Uptake and Release in the Heart and in Isolated Ventricular Myocytes, 1139

α_1-Adrenoceptors
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308

β-Adrenoceptors
Age-Related Alterations in the Phosphorylation of Sarcoplasmic Reticulum and Myofibrillar Proteins and Diminished Contractile Response to Isoproterenol in Intact Rat Ventricle, 102

Aequorin
Effects of the Positive Inotropic Agent Org 30029 on Developed Force and Aequorin Light Transients in Intact Canine Ventricular Myocardium, 597

Aging
Age-Related Alterations in the Phosphorylation of Sarcoplasmic Reticulum and Myofibrillar Proteins and Diminished Contractile Response to Isoproterenol in Intact Rat Ventricle, 102
Age-Related Changes in Sarcoplasmic Reticulum Ca^{2+}-ATPase and α-Smooth Muscle Actin Gene Expression in Aortas of Normotensive and Spontaneously Hypertensive Rats, 341

Albumin-gold complex
Increased Capillary Permeability to Albumin in Diabetic Rat Myocardium, 947

Angiogenesis
Acidic Fibroblast Growth Factor and Heart Development: Role in Myocyte Proliferation and Capillary Angiogenesis, 7

Angiotensin converting enzyme
Feedback Regulation of Angiotensin Converting Enzyme Activity and mRNA Levels by Angiotensin II, 312

Angiotensin converting enzyme inhibitor
Feedback Regulation of Angiotensin Converting Enzyme Activity and mRNA Levels by Angiotensin II, 312

Angiotensin converting enzyme inhibitors
Role of Kinins and Nitric Oxide in the Effects of Angiotensin Converting Enzyme Inhibitors on Neointima Formation, 1202

Angiotensin II
Angiotensin II Is Mitogenic in Neonatal Rat Cardiac Fibroblasts, 1245
Feedback Regulation of Angiotensin Converting Enzyme Activity and mRNA Levels by Angiotensin II, 312
Regulation of Diacylglycerol Metabolism by Vasoconstrictor Hormones in Intact Small Arteries, 1163
Regulation of Insulin-Like Growth Factor I Receptors on Vascular Smooth Muscle Cells by Growth Factors and Phorbol Esters, 1285

Angiotensin II receptors
Regulation of Angiotensin II Receptors on Ventricular Myocytes After Myocardial Infarction in Rats, 1149

Anodal block
Selective Contribution of Two Types of Carotid Sinus Baroreceptors to the Control of Blood Pressure, 1011
Anoxia
Direct Detection of Endogenous Hydroxyl Radical Production in Cultured Adult Cardiomyocytes During Anoxia and Reoxygenation: Is the Hydroxyl Radical Really the Most Damaging Radical Species? 725
Antiarrhythmic agents
Identification of a Specific Radioligand for the Cardiac Rapidly Activating Delayed Rectifier K^+ Channel, 707
Antiarrhythmic drugs
Heteromultimeric Assembly of Human Potassium Channels: Molecular Basis of a Transient Outward Current? 1326
Anticoagulation
Comparison of Hirudin and Heparin as Adjuncts to Streptokinase Thrombolysis in a Canine Model of Coronary Thrombosis, 1091
Arachidonic acid
Alteration of Reactivity of Native Arteries Induced by Venous Graft Placement, 319
Endothelium-Dependent Contractions in Rabbit Pulmonary Artery Are Mediated by Thromboxane A_2, 1023
Modulation of Ca^{2+} Cycling in Cardiac Myocytes by Arachidonic Acid, 376
Area postrema
Endothelin as a Neuropeptide: Cardiovascular Effects in the Brainstem of Normotensive Rats, 20
Inhibition of Nitric Oxide Formation in the Nucleus Tractus Solitarius Increases Renal Sympathetic Nerve Activity in Rabbits, 511
L-Arginine
Diminished Basal Nitric Oxide Release After Myocardial Ischemia and Reperfusion Promotes Neutrophil Adherence to Coronary Endothelium, 403
Nitric Oxide Mediates Vasodilatation in Response to Activation of *N*-Methyl-D-Aspartate Receptors in Brain, 476
Arginine vasopressin
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255
Arrhythmias
Inhibition of Gap Junctional Conductance by Long-Chain Acylcarnitines and Their Preferential Accumulation in Junctional Sarcolemma During Hypoxia, 879
Arterioles
Coronary Venular Responses to Flow and Pressure, 607
Atherosclerosis
Altered Vascular Responses to Platelets From Hypercholesterolemic Humans, 737
Oral Contraceptive Treatment Decreases Arterial Low Density Lipoprotein Degradation in Female Cynomolgus Monkeys, 1300
XeCl Laser–Induced Fluorescence of Atherosclerotic Arteries: Spectral Similarities Between Lipid-Rich Lesions and Peroxidized Lipoproteins, 84
ATP
Heterogeneity of ATP Receptors in Aortic Endothelial Cells: Involvement of P_{2y} and P_{2u} Receptors in Inositol Phosphate Response, 504
Modulation of Ca^{2+} Cycling in Cardiac Myocytes by Arachidonic Acid, 376
ATP depletion
Cationic Amphiphiles Prevent Calcium Leak Induced by ATP Depletion in Myocardial Cells, 214
ATP-sensitive K^+ channel
Intracellular H^+ and Ca^{2+} Modulation of Trypsin-Modified ATP-Sensitive K^+ Channels in Rabbit Ventricular Myocytes, 715
ATP-sensitive K^+ channels
Blockade of ATP-Sensitive Potassium Channels Increases Infarct Size but Does Not Prevent Preconditioning in Rabbit Hearts, 44
Atrial cardiomyocytes
Structure, Expression, and Genomic Mapping of the Mouse Natriuretic Peptide Type-B Gene, 984
Atrial cells
Novel Cation-Selective Mechanosensitive Ion Channel in the Atrial Cell Membrane, 225
Atrial compliance
Altered Left Atrial Compliance After Atrial Appendectomy: Influence on Left Atrial and Ventricular Filling, 167
Atrial function
Altered Left Atrial Compliance After Atrial Appendectomy: Influence on Left Atrial and Ventricular Filling, 167
Atrial natriuretic peptide secretion
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Atrium
Platelet-Activating Factor Receptor–Dependent Activation of the Muscarinic K^+ Current in Bullfrog Atrial Myocytes, 786
Autonomic nerves
Intense Sympathetic Stimulation Releases Neuropeptide Y but Fails to Evoke Sustained Coronary Vasoconstriction in Dogs, 816
Autonomic nervous system
Effects of Intense Antecedent Sympathetic Stimulation on Sympathetic Neurotransmission in the Heart, 137
Respiratory Modulation of Muscle Sympathetic Nerve Activity in Intact and Lung Denervated Humans, 440
Autoregulation
Role of Shear Stress and Endothelial Prostaglandins in Flow- and Viscosity-Induced Dilation of Arterioles In Vitro, 1276

B

Baroreceptor reflex
Selective Contribution of Two Types of Carotid Sinus Baroreceptors to the Control of Blood Pressure, 1011
Baroreceptors
Selective Contribution of Two Types of Carotid Sinus Baroreceptors to the Control of Blood Pressure, 1011
Baroreflex
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255
Inhibition of Nitric Oxide Formation in the Nucleus Tractus Solitarius Increases Renal Sympathetic Nerve Activity in Rabbits, 511
Beating heart
In Vivo Observation of Subendocardial Microvessels of the Beating Porcine Heart Using a Needle-Probe Videomicroscope With a CCD Camera, 939
Biomechanics
Contraction and Relaxation of Isolated Cardiac Myocytes of the Frog Under Varying Mechanical Loads, 297
Blood pressure
Endothelin as a Neuropeptide: Cardiovascular Effects in the Brainstem of Normotensive Rats, 20
BQ123
Characterization and Localization of Endothelin Receptor Subtypes in the Human Atrioventricular Conducting System and Myocardium, 526
BQ3020
Characterization and Localization of Endothelin Receptor Subtypes in the Human Atrioventricular Conducting System and Myocardium, 526
Bumetanide
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Bupivacaine
Selective Contribution of Two Types of Carotid Sinus Baroreceptors to the Control of Blood Pressure, 1011

C

c-fos
Identification of Functional PGH_2/T_xA_2 Receptors on Human Endothelial Cells, 958

Ca^{2+}
Mechanical Stress Mechanisms and the Cell: An Endothelial Paradigm, 239
Modulation of Ca^{2+} Cycling in Cardiac Myocytes by Arachidonic Acid, 376
Ca^{2+}-ATPase
Alterations in Sarcoplasmic Reticulum Gene Expression in Human Heart Failure: A Possible Mechanism for Alterations in Systolic and Diastolic Properties of the Failing Myocardium, 463
Ca^{2+} transport
Regulation of Ca^{2+} Transport by Platelet-Derived Growth Factor-BB in Rat Vascular Smooth Muscle Cells, 847
Ca^{2+} transients
Effects of the Positive Inotropic Agent Org 30029 on Developed Force and Aequorin Light Transients in Intact Canine Ventricular Myocardium, 597
Calcium
Altered Calcium Sensitivity of Isometric Tension in Myocyte-Sized Preparations of Porcine Postischemic Stunned Myocardium, 50
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308
Identification of Functional PGH_2/TxA_2 Receptors on Human Endothelial Cells, 958
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Phosphatidic Acid Stimulates Inositol 1,4,5-Trisphosphate Production in Adult Cardiac Myocytes, 701
Calcium channels
Dual Effect of Thrombin on Voltage-Dependent Ca^{2+} Channels of Portal Vein Smooth Muscle Cells, 1317
Molecular Cloning of Three Isoforms of the L-Type Voltage-Dependent Calcium Channel β Subunit From Normal Human Heart, 1337
Calcium current
The Effect of Exchanger Inhibitory Peptide (XIP) on Sodium–Calcium Exchange Current in Guinea Pig Ventricular Cells, 497
Calcium flux
Novel Cation-Selective Mechanosensitive Ion Channel in the Atrial Cell Membrane, 225
Calcium leak
Cationic Amphiphiles Prevent Calcium Leak Induced by ATP Depletion in Myocardial Cells, 214
Calcium overload
Reperfusion After Brief Ischemia Disrupts the Microtubule Network in Canine Hearts, 361
Calsequestrin
Alterations in Sarcoplasmic Reticulum Gene Expression in Human Heart Failure: A Possible Mechanism for Alterations in Systolic and Diastolic Properties of the Failing Myocardium, 463
cAMP
Age-Related Alterations in the Phosphorylation of Sarcoplasmic Reticulum and Myofibrillar Proteins and Diminished Contractile Response to Isoproterenol in Intact Rat Ventricle, 102
Hypoxia Causes an Abnormal Contractile Response in the Atherosclerotic Rabbit Aorta: Implication of Reduced Nitric Oxide and cGMP Production, 616
Mechanism of cAMP-Dependent Modulation of Cardiac Sodium Channel Current Kinetics, 807
Canine myocardium
Gene Injection Into Canine Myocardium as a Useful Model for Studying Gene Expression in the Heart of Large Mammals, 688
Capillary permeability
Increased Capillary Permeability to Albumin in Diabetic Rat Myocardium, 947
Cardiac α-myosin heavy chain
Distinct Behavior of Cardiac Myosin Heavy Chain Gene Constructs In Vivo: Discordance With In Vitro Results, 1211
Cardiac action potential
Alterations in Electrical Activity and Membrane Currents Induced by Intracellular Oxygen-Derived Free Radical Stress in Guinea Pig Ventricular Myocytes, 1229
Cardiac cell
Contraction and Relaxation of Isolated Cardiac Myocytes of the Frog Under Varying Mechanical Loads, 297
Cardiac contractility
Cardiac Endothelial Cells Modulate Contractility of Rat Heart in Response to Oxygen Tension and Coronary Flow, 1044
Mechanical Properties of Rat Cardiac Skinned Fibers Are Altered by Chronic Growth Hormone Hypersecretion, 57
Cardiac cycle
In Vivo Observation of Subendocardial Microvessels of the Beating Porcine Heart Using a Needle-Probe Videomicroscope With a CCD Camera, 939
Cardiac development
Troponin I Gene Expression During Human Cardiac Development and in End-Stage Heart Failure, 932
Cardiac electrophysiology
Computer Simulations of Three-Dimensional Propagation in Ventricular Myocardium: Effects of Intramural Fiber Rotation and Inhomogeneous Conductivity on Epicardial Activation, 744
In Vivo Estimation of Cardiac Transmembrane Current, 424
Selective A_2-Adenosine Receptor Agonists Do Not Alter Action Potential Duration, Twitch Shortening, or cAMP Accumulation in Guinea Pig, Rat, or Rabbit Isolated Ventricular Myocytes, 194
Cardiac excitation–contraction coupling
Heteromultimeric Assembly of Human Potassium Channels: Molecular Basis of a Transient Outward Current? 1326
Cardiac fibroblasts
Angiotensin II Is Mitogenic in Neonatal Rat Cardiac Fibroblasts, 1245
Cardiac hypertrophy
Angiotensin II Is Mitogenic in Neonatal Rat Cardiac Fibroblasts, 1245
Antithetical Accumulation of Myosin Heavy Chain but Not α-Actin mRNA Isoforms During Early Stages of Pressure-Overload–Induced Rat Cardiac Hypertrophy, 857
Cardiac mapping
Epicardial Mapping of Ventricular Defibrillation With Monophasic and Biphasic Shocks in Dogs, 145
Cardiac mechanics
Residual Strain in the Ventricle of the Stage 16–24 Chick Embryo, 455
Cardiac muscle
Dystrophin-Glycoprotein Complex and Laminin Colocalize to the Sarcolemma and Transverse Tubules of Cardiac Muscle, 349
Muscle-Specific Gene Expression: A Comparison of Cardiac and Skeletal Muscle Transcription Strategies, 925
Regulation of Muscle Transcription by the MyoD Family: The Heart of the Matter, 1
Cardiac myocytes
Acetylcholine Reversal of Isoproterenol-Stimulated Sodium Currents in Rabbit Ventricular Myocytes, 517
Modulation of Ca^{2+} Cycling in Cardiac Myocytes by Arachidonic Acid, 376
Cardiac parasympathetic nerves
Effects of Intense Antecedent Sympathetic Stimulation on Sympathetic Neurotransmission in the Heart, 137
Cardiac sympathetic nerves
Effects of Intense Antecedent Sympathetic Stimulation on Sympathetic Neurotransmission in the Heart, 137
Cardiomyocytes
Cationic Amphiphiles Prevent Calcium Leak Induced by ATP Depletion in Myocardial Cells, 214
Cardiomyopathy
Myocardial Fibrin Deposition in Experimental Viral Myocarditis That Progresses to Dilated Cardiomyopathy, 914

Cardiopulmonary bypass
Tissue Factor Is Expressed on Monocytes During Simulated Extracorporeal Circulation, 1075
Cardiorespiratory interactions
Respiratory Modulation of Muscle Sympathetic Nerve Activity in Intact and Lung Denervated Humans, 440
Cardiovascular development
Residual Strain in the Ventricle of the Stage 16–24 Chick Embryo, 455
Carotid artery
Altered Vascular Responses to Platelets From Hypercholesterolemic Humans, 737
Cationic amphiphiles
Cationic Amphiphiles Prevent Calcium Leak Induced by ATP Depletion in Myocardial Cells, 214
cDNA cloning
Molecular Cloning of Three Isoforms of the L-Type Voltage-Dependent Calcium Channel β Subunit From Normal Human Heart, 1337
Cell growth
Angiotensin II Is Mitogenic in Neonatal Rat Cardiac Fibroblasts, 1245
Cellular K^+ loss
Dissociation Between Cellular K^+ Loss, Reduction in Repolarization Time, and Tissue ATP Levels During Myocardial Hypoxia and Ischemia, 560
Cellular proliferation
Effects of Thiol Protease Inhibitors on Cell Cycle and Proliferation of Vascular Smooth Muscle Cells in Culture, 413
Cerebral arterioles
Nitric Oxide Mediates Vasodilatation in Response to Activation of *N*-Methyl-D-Aspartate Receptors in Brain, 476
Cerebral artery
Impairment by Damage of the Pterygopalatine Ganglion of Nitroxidergic Vasodilator Nerve Function in Canine Cerebral and Retinal Arteries, 206
Cerebral circulation
Parasympathetic Cerebrovasodilator Center of the Facial Nerve, 470
cGMP
Hypoxia Causes an Abnormal Contractile Response in the Atherosclerotic Rabbit Aorta: Implication of Reduced Nitric Oxide and cGMP Production, 616
Inhaled Nitric Oxide Reverses Pulmonary Vasoconstriction in the Hypoxic and Acidotic Newborn Lamb, 246
Chick embryo
Comparison of the Number of Dihydropyridine Receptors With the Number of Functional L-Type Calcium Channels in Embryonic Heart, 396
Chick embryos
Residual Strain in the Ventricle of the Stage 16–24 Chick Embryo, 455
Class III antiarrhythmic agents
Background Potassium Current Active During the Plateau of the Action Potential in Guinea Pig Ventricular Myocytes, 890
Single Delayed Rectifier Channels in the Membrane of Rabbit Ventricular Myocytes, 865
Cocaine
Extracellular Ca^{2+}-Dependent Potentiation by Cocaine of Serotonin- and Norepinephrine-Induced Contractions in Rat Vascular Smooth Muscle, 1191
Computer simulation
Computer Simulations of Three-Dimensional Propagation in Ventricular Myocardium: Effects of Intramural Fiber Rotation and Inhomogeneous Conductivity on Epicardial Activation, 744
Conduction tissue
Evidence for a Distinct Gap-Junctional Phenotype in Ventricular Conduction Tissues of the Developing and Mature Avian Heart, 278
Confocal microscopy
Anti–Ryanodine Receptor Antibody Binding Sites in Vascular and Endocardial Endothelium, 481
Connexin
Evidence for a Distinct Gap-Junctional Phenotype in Ventricular Conduction Tissues of the Developing and Mature Avian Heart, 278
Contractile response
Regulation of Diacylglycerol Metabolism by Vasoconstrictor Hormones in Intact Small Arteries, 1163
Contractility
Effect of Dysfunctional Vascular Endothelium on Myocardial Performance in Isolated Papillary Muscles, 768
Endocardial Versus Epicardial Differences of Intracellular Free Calcium Under Normal and Ischemic Conditions in Perfused Rat Hearts, 1082
Hypoxia Enhances Isoproterenol-Induced Increase in Heart Interstitial Adenosine, Depressing β-Adrenergic Contractile Responses, 571
Coronary blood vessels
Intense Sympathetic Stimulation Releases Neuropeptide Y but Fails to Evoke Sustained Coronary Vasoconstriction in Dogs, 816
Coronary circulation
In Vivo Observation of Subendocardial Microvessels of the Beating Porcine Heart Using a Needle-Probe Videomicroscope With a CCD Camera, 939
Coronary microcirculation
Coronary Venular Responses to Flow and Pressure, 607
Coronary vasodilation
Coronary Pressure–Flow Relation in Left Ventricular Hypertrophy: Importance of Changes in Back Pressure Versus Changes in Minimum Resistance, 579
Coronary vasodilator reserve
Coronary Pressure–Flow Relation in Left Ventricular Hypertrophy: Importance of Changes in Back Pressure Versus Changes in Minimum Resistance, 579
Coxsackievirus
Myocardial Fibrin Deposition in Experimental Viral Myocarditis That Progresses to Dilated Cardiomyopathy, 914
Crossbridge cycling
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308
Crossbridges
Mechanical Properties of Rat Cardiac Skinned Fibers Are Altered by Chronic Growth Hormone Hypersecretion, 57
Cyclooxygenase
Endothelium-Dependent Contractions in Rabbit Pulmonary Artery Are Mediated by Thromboxane A_2, 1023
Cynomolgus monkeys
Oral Contraceptive Treatment Decreases Arterial Low Density Lipoprotein Degradation in Female Cynomolgus Monkeys, 1300
Cytochrome P450
20-Hydroxyeicosatetraenoic Acid Is an Endogenous Vasoconstrictor of Canine Renal Arcuate Arteries, 126
Cytoskeleton
Reperfusion After Brief Ischemia Disrupts the Microtubule Network in Canine Hearts, 361
Cytosolic free calcium
Extracellular Ca^{2+}-Dependent Potentiation by Cocaine of Serotonin- and Norepinephrine-Induced Contractions in Rat Vascular Smooth Muscle, 1191
Cytosolic free calcium concentration
Mechanism of Preconditioning: Ionic Alterations, 112

D

Deacylation
Physiological pH: Effects on Posthypoxic Proximal Tubular Injury, 837
Deferoxamine
Activation of Ischemia- and Reperfusion-Sensitive Abdominal Visceral C Fiber Afferents: Role of Hydrogen Peroxide and Hydroxyl Radicals, 1266
Direct Detection of Endogenous Hydroxyl Radical Production in Cultured Adult Cardiomyocytes During Anoxia and Reox-

ygenation: Is the Hydroxyl Radical Really the Most Damaging Radical Species? 725

Defibrillation
Epicardial Mapping of Ventricular Defibrillation With Monophasic and Biphasic Shocks in Dogs, 145
Optical Measurements of Transmembrane Potential Changes During Electric Field Stimulation of Ventricular Cells, 255

Delayed rectifier current
Single Delayed Rectifier Channels in the Membrane of Rabbit Ventricular Myocytes, 865

Delayed rectifier K^+ channels
Identification of a Specific Radioligand for the Cardiac Rapidly Activating Delayed Rectifier K^+ Channel, 707

Delayed rectifier K^+ current
Rate-Dependent Prolongation of Cardiac Action Potentials by a Methanesulfonanilide Class III Antiarrhythmic Agent: Specific Block of Rapidly Activating Delayed Rectifier K^+ Current by Dofetilide, 75

Development
Ca^{2+} Channel Kinetics in Acutely Isolated Fetal, Neonatal, and Adult Rabbit Cardiac Myocytes, 1065
Evidence for a Distinct Gap-Junctional Phenotype in Ventricular Conduction Tissues of the Developing and Mature Avian Heart, 278

Diabetic cardiomyopathy
Increased Capillary Permeability to Albumin in Diabetic Rat Myocardium, 947

Diacetyl monoxime
Optical Measurements of Transmembrane Potential Changes During Electric Field Stimulation of Ventricular Cells, 255

Diacylglycerol
Phosphatidic Acid Stimulates Inositol 1,4,5-Trisphosphate Production in Adult Cardiac Myocytes, 701
Regulation of Diacylglycerol Metabolism by Vasoconstrictor Hormones in Intact Small Arteries, 1163

Diacylglycerol kinase
Regulation of Diacylglycerol Metabolism by Vasoconstrictor Hormones in Intact Small Arteries, 1163

Diastole
Effect of Heart Failure on the Mechanism of Exercise-Induced Augmentation of Mitral Valve Flow, 795
Effects of Chronic Mitral Regurgitation on Diastolic Function in Isolated Cardiocytes, 1110

Dihydropyridine receptors
Comparison of the Number of Dihydropyridine Receptors With the Number of Functional L-Type Calcium Channels in Embryonic Heart, 396

Dimethylthiourea
Activation of Ischemia- and Reperfusion-Sensitive Abdominal Visceral C Fiber Afferents: Role of Hydrogen Peroxide and Hydroxyl Radicals, 1266

Diphenylphenylenediamine
Direct Detection of Endogenous Hydroxyl Radical Production in Cultured Adult Cardiomyocytes During Anoxia and Reoxygenation: Is the Hydroxyl Radical Really the Most Damaging Radical Species? 725

Dipropylcyclopentylxanthine
Hypoxia Enhances Isoproterenol-Induced Increase in Heart Interstitial Adenosine, Depressing β-Adrenergic Contractile Responses, 571

Dofetilide
Identification of a Specific Radioligand for the Cardiac Rapidly Activating Delayed Rectifier K^+ Channel, 707

Dogs
Effects of the Positive Inotropic Agent Org 30029 on Developed Force and Aequorin Light Transients in Intact Canine Ventricular Myocardium, 597

Doppler effect
Spiral Waves of Excitation Underlie Reentrant Activity in Isolated Cardiac Muscle, 631

Drifting spirals
Spiral Waves of Excitation Underlie Reentrant Activity in Isolated Cardiac Muscle, 631

Ductus arteriosus
Fetal Ductus Arteriosus Ligation: Pulmonary Vascular Smooth Muscle Biochemical and Mechanical Changes, 588
Mechanisms of Oxygen-Induced Contraction of Ductus Arteriosus Isolated From the Fetal Rabbit, 1218

Dystrophin-glycoprotein complex
Dystrophin-Glycoprotein Complex and Laminin Colocalize to the Sarcolemma and Transverse Tubules of Cardiac Muscle, 349

E

E-4031
Single Delayed Rectifier Channels in the Membrane of Rabbit Ventricular Myocytes, 865

Electrical uncoupling
Inhibition of Gap Junctional Conductance by Long-Chain Acylcarnitines and Their Preferential Accumulation in Junctional Sarcolemma During Hypoxia, 879

Electron microscopy
Increased Capillary Permeability to Albumin in Diabetic Rat Myocardium, 947

Electrophysiology
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671
Molecular Basis of Permeation in Voltage-Gated Ion Channels, 491

End-stage heart failure
Troponin I Gene Expression During Human Cardiac Development and in End-Stage Heart Failure, 932

Endocardium
Effect of Dysfunctional Vascular Endothelium on Myocardial Performance in Isolated Papillary Muscles, 768
Endocardial Versus Epicardial Differences of Intracellular Free Calcium Under Normal and Ischemic Conditions in Perfused Rat Hearts, 1082
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671

Endothelial cells
Cardiac Endothelial Cells Modulate Contractility of Rat Heart in Response to Oxygen Tension and Coronary Flow, 1044
Endothelium-Dependent Contractions in Rabbit Pulmonary Artery Are Mediated by Thromboxane A_2, 1023
Flow-Related Responses of Intracellular Inositol Phosphate Levels in Cultured Aortic Endothelial Cells, 827
Heterogeneity of ATP Receptors in Aortic Endothelial Cells: Involvement of P_{2y} and P_{2u} Receptors in Inositol Phosphate Response, 504
Mechanical Stress Mechanisms and the Cell: An Endothelial Paradigm, 239
Regulation of the Endothelial Cell Urokinase-Type Plasminogen Activator Receptor: Evidence for Cyclic AMP–Dependent and Protein Kinase C–Dependent Pathways, 330

Endothelin
Characterization and Localization of Endothelin Receptor Subtypes in the Human Atrioventricular Conducting System and Myocardium, 526
Characterization of Protein Kinase C Isotype Expression in Adult Rat Heart: Protein Kinase C-ϵ Is a Major Isotype Present, and It Is Activated by Phorbol Esters, Epinephrine, and Endothelin, 757
Hypoxia Causes an Abnormal Contractile Response in the Atherosclerotic Rabbit Aorta: Implication of Reduced Nitric Oxide and cGMP Production, 616

Endothelin ET_A
Characterization and Localization of Endothelin Receptor Subtypes in the Human Atrioventricular Conducting System and Myocardium, 526

Endothelin ET_B
Characterization and Localization of Endothelin Receptor Subtypes in the Human Atrioventricular Conducting System and Myocardium, 526

Endothelium
Anti–Ryanodine Receptor Antibody Binding Sites in Vascular and Endocardial Endothelium, 481
Coronary Venular Responses to Flow and Pressure, 607
Endothelium-Dependent Relaxation of Hypertensive Resistance Arteries Is Not Impaired Under All Conditions, 290
High Density Lipoprotein Reverses Inhibitory Effect of Oxidized Low Density Lipoprotein on Endothelium-Dependent Arterial Relaxation, 1103
Identification of Functional PGH_2/TxA_2 Receptors on Human Endothelial Cells, 958
In Vivo Gene Transfer and Expression in Normal Uninjured Blood Vessels Using Replication-Deficient Recombinant Adenovirus Vectors, 1132
Platelets Protect Against Myocardial Dysfunction and Injury Induced by Ischemia and Reperfusion in Isolated Rat Hearts, 1181
Endothelium-dependent relaxation
Effects of Lysolipids and Oxidatively Modified Low Density Lipoprotein on Endothelium-Dependent Relaxation of Rabbit Aorta, 161
High Density Lipoprotein Reverses Inhibitory Effect of Oxidized Low Density Lipoprotein on Endothelium-Dependent Arterial Relaxation, 1103
Endothelium-dependent responses
Hypoxia Causes an Abnormal Contractile Response in the Atherosclerotic Rabbit Aorta: Implication of Reduced Nitric Oxide and cGMP Production, 616
Endothelium-derived relaxing factor
Alteration of Reactivity of Native Arteries Induced by Venous Graft Placement, 319
Coronary Venular Responses to Flow and Pressure, 607
Diminished Basal Nitric Oxide Release After Myocardial Ischemia and Reperfusion Promotes Neutrophil Adherence to Coronary Endothelium, 403
Inhaled Nitric Oxide Reverses Pulmonary Vasoconstriction in the Hypoxic and Acidotic Newborn Lamb, 246
Natural Course of Endothelium-Dependent and -Independent Responses in Autogenous Femoral Veins Grafted Into the Arterial Circulation of the Dog, 1004
Endothelium-derived relaxing factor/nitric oxide
Role of Kinins and Nitric Oxide in the Effects of Angiotensin Converting Enzyme Inhibitors on Neointima Formation, 1202
Epicardium
Endocardial Versus Epicardial Differences of Intracellular Free Calcium Under Normal and Ischemic Conditions in Perfused Rat Hearts, 1082
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671
Epinephrine
Characterization of Protein Kinase C Isotype Expression in Adult Rat Heart: Protein Kinase C-ϵ Is a Major Isotype Present, and It Is Activated by Phorbol Esters, Epinephrine, and Endothelin, 757
Erythrocyte transit time
Regional Myocardial Capillary Erythrocyte Transit Time in the Normal Resting Heart, 187
Estrogen
Oral Contraceptive Treatment Decreases Arterial Low Density Lipoprotein Degradation in Female Cynomolgus Monkeys, 1300
Exchanger inhibitory peptide
The Effect of Exchanger Inhibitory Peptide (XIP) on Sodium–Calcium Exchange Current in Guinea Pig Ventricular Cells, 497
Exercise
Effect of Heart Failure on the Mechanism of Exercise-Induced Augmentation of Mitral Valve Flow, 795

F

Feedback regulation
Feedback Regulation of Angiotensin Converting Enzyme Activity and mRNA Levels by Angiotensin II, 312
Feeding
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Females
Oral Contraceptive Treatment Decreases Arterial Low Density Lipoprotein Degradation in Female Cynomolgus Monkeys, 1300
Fetal
Mechanisms of Oxygen-Induced Contraction of Ductus Arteriosus Isolated From the Fetal Rabbit, 1218
Fiber rotation
Computer Simulations of Three-Dimensional Propagation in Ventricular Myocardium: Effects of Intramural Fiber Rotation and Inhomogeneous Conductivity on Epicardial Activation, 744
Fibrillation
Epicardial Mapping of Ventricular Defibrillation With Monophasic and Biphasic Shocks in Dogs, 145
Fibrin
Myocardial Fibrin Deposition in Experimental Viral Myocarditis That Progresses to Dilated Cardiomyopathy, 914
Fibroblast growth factor
Regulation of Insulin-Like Growth Factor I Receptors on Vascular Smooth Muscle Cells by Growth Factors and Phorbol Esters, 1285
Fibroblast growth factor receptor
Acidic Fibroblast Growth Factor and Heart Development: Role in Myocyte Proliferation and Capillary Angiogenesis, 7
Flow-induced response
Coronary Venular Responses to Flow and Pressure, 607
Flow velocity
Role of Shear Stress and Endothelial Prostaglandins in Flow- and Viscosity-Induced Dilation of Arterioles In Vitro, 1276
Fluorescence spectroscopy
XeCl Laser–Induced Fluorescence of Atherosclerotic Arteries: Spectral Similarities Between Lipid-Rich Lesions and Peroxidized Lipoproteins, 84
Fractional shortening
Reperfusion After Brief Ischemia Disrupts the Microtubule Network in Canine Hearts, 361
Free radicals
Measurement of Na^+-K^+ Pump Current in Isolated Rabbit Ventricular Myocytes Using the Whole-Cell Voltage-Clamp Technique: Inhibition of the Pump by Oxidant Stress, 91
Fura-2
Modulation of Ca^{2+} Cycling in Cardiac Myocytes by Arachidonic Acid, 376
Fura-2 AM
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308

G

G protein α-subunit
Isoprenaline Stimulates Gene Transcription of the Inhibitory G Protein α-Subunit $G_{i\alpha\text{-}2}$ in Rat Heart, 696
G proteins
Platelet-Activating Factor Receptor–Dependent Activation of the Muscarinic K^+ Current in Bullfrog Atrial Myocytes, 786
Gap junctions
Distinct Patterns of Connexin Expression in Canine Purkinje Fibers and Ventricular Muscle, 1124
Evidence for a Distinct Gap-Junctional Phenotype in Ventricular Conduction Tissues of the Developing and Mature Avian Heart, 278
Inhibition of Gap Junctional Conductance by Long-Chain Acylcarnitines and Their Preferential Accumulation in Junctional Sarcolemma During Hypoxia, 879
Gene expression
Feedback Regulation of Angiotensin Converting Enzyme Activity and mRNA Levels by Angiotensin II, 312
In Vivo Gene Transfer and Expression in Normal Uninjured Blood Vessels Using Replication-Deficient Recombinant Adenovirus Vectors, 1132

Muscle-Specific Gene Expression: A Comparison of Cardiac and Skeletal Muscle Transcription Strategies, 925
Troponin I Gene Expression During Human Cardiac Development and in End-Stage Heart Failure, 932
Gene expression regulation
Abdominal Coarctation Increases Insulin-Like Growth Factor I mRNA Levels in Rat Aorta, 271
Gene transfer
In Vivo Gene Transfer and Expression in Normal Uninjured Blood Vessels Using Replication-Deficient Recombinant Adenovirus Vectors, 1132
Glibenclamide
Blockade of ATP-Sensitive Potassium Channels Increases Infarct Size but Does Not Prevent Preconditioning in Rabbit Hearts, 44
Mechanosensitive Gating of Atrial ATP-Sensitive Potassium Channels, 973
Glutamate
Nitric Oxide Mediates Vasodilatation in Response to Activation of *N*-Methyl-D-Aspartate Receptors in Brain, 476
Glycolysis
Dissociation Between Cellular K^+ Loss, Reduction in Repolarization Time, and Tissue ATP Levels During Myocardial Hypoxia and Ischemia, 560
Growth factors
Acidic Fibroblast Growth Factor and Heart Development: Role in Myocyte Proliferation and Capillary Angiogenesis, 7
Growth hormone
Mechanical Properties of Rat Cardiac Skinned Fibers Are Altered by Chronic Growth Hormone Hypersecretion, 57
Growth substances
Abdominal Coarctation Increases Insulin-Like Growth Factor I mRNA Levels in Rat Aorta, 271
Guanine nucleotide binding protein
Angiotensin II Is Mitogenic in Neonatal Rat Cardiac Fibroblasts, 1245
Guinea pig ventricular cells
The Effect of Exchanger Inhibitory Peptide (XIP) on Sodium–Calcium Exchange Current in Guinea Pig Ventricular Cells, 497
Guinea pigs
Rate-Dependent Prolongation of Cardiac Action Potentials by a Methanesulfonanilide Class III Antiarrhythmic Agent: Specific Block of Rapidly Activating Delayed Rectifier K^+ Current by Dofetilide, 75

H

Heart
Age-Related Alterations in the Phosphorylation of Sarcoplasmic Reticulum and Myofibrillar Proteins and Diminished Contractile Response to Isoproterenol in Intact Rat Ventricle, 102
Ca^{2+} Channel Kinetics in Acutely Isolated Fetal, Neonatal, and Adult Rabbit Cardiac Myocytes, 1065
Comparison of the Number of Dihydropyridine Receptors With the Number of Functional L-Type Calcium Channels in Embryonic Heart, 396
Evidence for a Distinct Gap-Junctional Phenotype in Ventricular Conduction Tissues of the Developing and Mature Avian Heart, 278
Heteromultimeric Assembly of Human Potassium Channels: Molecular Basis of a Transient Outward Current? 1326
Measurement of Na^+-K^+ Pump Current in Isolated Rabbit Ventricular Myocytes Using the Whole-Cell Voltage-Clamp Technique: Inhibition of the Pump by Oxidant Stress, 91
Heart failure
Effect of Heart Failure on the Mechanism of Exercise-Induced Augmentation of Mitral Valve Flow, 795
Heart gene expression
Structure, Expression, and Genomic Mapping of the Mouse Natriuretic Peptide Type-B Gene, 984
Heart rate
Effects of Intense Antecedent Sympathetic Stimulation on Sympathetic Neurotransmission in the Heart, 137
Intense Sympathetic Stimulation Releases Neuropeptide Y but Fails to Evoke Sustained Coronary Vasoconstriction in Dogs, 816
Hemodynamics
Flow-Related Responses of Intracellular Inositol Phosphate Levels in Cultured Aortic Endothelial Cells, 827
Heparin
Comparison of Hirudin and Heparin as Adjuncts to Streptokinase Thrombolysis in a Canine Model of Coronary Thrombosis, 1091
Hepatic denervation
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Hepatic nerve
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Hepatorenal reflex
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Heterogeneity
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671
Heterotetramer
Heteromultimeric Assembly of Human Potassium Channels: Molecular Basis of a Transient Outward Current? 1326
5-(*N*,*N*-Hexamethylene)amiloride
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
High density lipoprotein
High Density Lipoprotein Reverses Inhibitory Effect of Oxidized Low Density Lipoprotein on Endothelium-Dependent Arterial Relaxation, 1103
High-performance liquid chromatography
Direct Detection of Endogenous Hydroxyl Radical Production in Cultured Adult Cardiomyocytes During Anoxia and Reoxygenation: Is the Hydroxyl Radical Really the Most Damaging Radical Species? 725
Hirudin
Comparison of Hirudin and Heparin as Adjuncts to Streptokinase Thrombolysis in a Canine Model of Coronary Thrombosis, 1091
Hormone receptors
Angiotensin II Is Mitogenic in Neonatal Rat Cardiac Fibroblasts, 1245
Human heart
Molecular Cloning of Three Isoforms of the L-Type Voltage-Dependent Calcium Channel β Subunit From Normal Human Heart, 1337
Human hearts
Characterization and Localization of Endothelin Receptor Subtypes in the Human Atrioventricular Conducting System and Myocardium, 526
20-Hydroxyeicosatetraenoic acid
20-Hydroxyeicosatetraenoic Acid Is an Endogenous Vasoconstrictor of Canine Renal Arcuate Arteries, 126
Hydroxyl radical
Direct Detection of Endogenous Hydroxyl Radical Production in Cultured Adult Cardiomyocytes During Anoxia and Reoxygenation: Is the Hydroxyl Radical Really the Most Damaging Radical Species? 725
Hypercholesterolemia
Altered Vascular Responses to Platelets From Hypercholesterolemic Humans, 737
Hypoxia Causes an Abnormal Contractile Response in the Atherosclerotic Rabbit Aorta: Implication of Reduced Nitric Oxide and cGMP Production, 616
Hypertension
Abdominal Coarctation Increases Insulin-Like Growth Factor I mRNA Levels in Rat Aorta, 271
Age-Related Changes in Sarcoplasmic Reticulum Ca^{2+}-ATPase and α-Smooth Muscle Actin Gene Expression in Aortas of Normotensive and Spontaneously Hypertensive Rats, 341

Hypertrophy
Effects of Chronic Mitral Regurgitation on Diastolic Function in Isolated Cardiocytes, 1110
Hypotension
Role of Platelet-Activating Factor in Hypotension and Platelet Activation Induced by Infusion of Thrombolytic Agents in Rabbits, 658
Hypotonic swelling
Novel Cation-Selective Mechanosensitive Ion Channel in the Atrial Cell Membrane, 225
Hypoxemia
Fetal Ductus Arteriosus Ligation: Pulmonary Vascular Smooth Muscle Biochemical and Mechanical Changes, 588
Hypoxic contraction
Hypoxia Causes an Abnormal Contractile Response in the Atherosclerotic Rabbit Aorta: Implication of Reduced Nitric Oxide and cGMP Production, 616

I

Immature myocardium
Ca^{2+} Channel Kinetics in Acutely Isolated Fetal, Neonatal, and Adult Rabbit Cardiac Myocytes, 1065
Immunoblotting
Characterization of Protein Kinase C Isotype Expression in Adult Rat Heart: Protein Kinase C-ϵ Is a Major Isotype Present, and It Is Activated by Phorbol Esters, Epinephrine, and Endothelin, 757
Immunocytochemical labeling
Dystrophin-Glycoprotein Complex and Laminin Colocalize to the Sarcolemma and Transverse Tubules of Cardiac Muscle, 349
Immunofluorescence
Distinct Patterns of Connexin Expression in Canine Purkinje Fibers and Ventricular Muscle, 1124
Immunofluorescense
Anti–Ryanodine Receptor Antibody Binding Sites in Vascular and Endocardial Endothelium, 481
Immunohistochemical staining
Reperfusion After Brief Ischemia Disrupts the Microtubule Network in Canine Hearts, 361
In situ hybridization
Distinct Patterns of Connexin Expression in Canine Purkinje Fibers and Ventricular Muscle, 1124
In vitro transcription assay
Isoprenaline Stimulates Gene Transcription of the Inhibitory G Protein α-Subunit $G_{i\alpha\text{-}2}$ in Rat Heart, 696
In vivo gene transfer
Gene Injection Into Canine Myocardium as a Useful Model for Studying Gene Expression in the Heart of Large Mammals, 688
In vivo promoter mapping
Gene Injection Into Canine Myocardium as a Useful Model for Studying Gene Expression in the Heart of Large Mammals, 688
Inactivation
Ca^{2+} Channel Kinetics in Acutely Isolated Fetal, Neonatal, and Adult Rabbit Cardiac Myocytes, 1065
Indo-1
Endocardial Versus Epicardial Differences of Intracellular Free Calcium Under Normal and Ischemic Conditions in Perfused Rat Hearts, 1082
Inhomogeneous conductivity
Computer Simulations of Three-Dimensional Propagation in Ventricular Myocardium: Effects of Intramural Fiber Rotation and Inhomogeneous Conductivity on Epicardial Activation, 744
Inositol 1,4,5-trisphosphate
Phosphatidylinositol Metabolism in Hypertrophic Rat Heart, 966
Inositol phosphates
Flow-Related Responses of Intracellular Inositol Phosphate Levels in Cultured Aortic Endothelial Cells, 827
Heterogeneity of ATP Receptors in Aortic Endothelial Cells: Involvement of P_{2y} and P_{2u} Receptors in Inositol Phosphate Response, 504
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308
Mechanical Stress Mechanisms and the Cell: An Endothelial Paradigm, 239
Phosphatidic Acid Stimulates Inositol 1,4,5-Trisphosphate Production in Adult Cardiac Myocytes, 701
Inositol trisphosphate kinase
Phosphatidylinositol Metabolism in Hypertrophic Rat Heart, 966
Inositol trisphosphate phosphatase
Phosphatidylinositol Metabolism in Hypertrophic Rat Heart, 966
Insulin-like growth factor I
Abdominal Coarctation Increases Insulin-Like Growth Factor I mRNA Levels in Rat Aorta, 271
Regulation of Insulin-Like Growth Factor I Receptors on Vascular Smooth Muscle Cells by Growth Factors and Phorbol Esters, 1285
Interaction
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255
Intercellular coupling
Distinct Patterns of Connexin Expression in Canine Purkinje Fibers and Ventricular Muscle, 1124
Intimal thickening
Natural Course of Endothelium-Dependent and -Independent Responses in Autogenous Femoral Veins Grafted Into the Arterial Circulation of the Dog, 1004
Intracellular calcium
20-Hydroxyeicosatetraenoic Acid Is an Endogenous Vasoconstrictor of Canine Renal Arcuate Arteries, 126
Intracellular ionized calcium
Mechanisms of Signal Transduction During α_2-Adrenergic Receptor–Mediated Contraction of Vascular Smooth Muscle, 778
Intracellular pH
Intracellular H^+ and Ca^{2+} Modulation of Trypsin-Modified ATP-Sensitive K^+ Channels in Rabbit Ventricular Myocytes, 715
Intracellular sodium concentration
Mechanism of Preconditioning: Ionic Alterations, 112
Inward rectifier current
Alterations in Electrical Activity and Membrane Currents Induced by Intracellular Oxygen-Derived Free Radical Stress in Guinea Pig Ventricular Myocytes, 1229
Single Delayed Rectifier Channels in the Membrane of Rabbit Ventricular Myocytes, 865
Inward rectifier currents
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671
Ion channel
Novel Cation-Selective Mechanosensitive Ion Channel in the Atrial Cell Membrane, 225
Ionic currents
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671
Ischemia
Activation of Ischemia- and Reperfusion-Sensitive Abdominal Visceral C Fiber Afferents: Role of Hydrogen Peroxide and Hydroxyl Radicals, 1266
Altered Calcium Sensitivity of Isometric Tension in Myocyte-Sized Preparations of Porcine Postischemic Stunned Myocardium, 50
Mechanisms of pH_i Recovery After Global Ischemia in the Perfused Heart, 993
Recovery of Regional Contractile Function and Oxidative Metabolism in Stunned Myocardium Induced by 1-Hour Circum-

flex Coronary Artery Stenosis in Chronically Instrumented Dogs, 901
Substrate-Induced Changes in the Lipid Content of Ischemic and Reperfused Myocardium: Its Relation to Hemodynamic Recovery, 176

Ischemic tolerance
Delayed Effects of Sublethal Ischemia on the Acquisition of Tolerance to Ischemia, 1293

Ishemic preconditioning
Blockade of ATP-Sensitive Potassium Channels Increases Infarct Size but Does Not Prevent Preconditioning in Rabbit Hearts, 44

Isolated coronary artery rings
Diminished Basal Nitric Oxide Release After Myocardial Ischemia and Reperfusion Promotes Neutrophil Adherence to Coronary Endothelium, 403

Isolated nuclei
Isoprenaline Stimulates Gene Transcription of the Inhibitory G Protein α-Subunit $G_{i\alpha\text{-}2}$ in Rat Heart, 696

Isometric stress
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308

Isoproterenol
Effects of the Positive Inotropic Agent Org 30029 on Developed Force and Aequorin Light Transients in Intact Canine Ventricular Myocardium, 597
Mechanism of cAMP-Dependent Modulation of Cardiac Sodium Channel Current Kinetics, 807

Isradipine
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035

K

K^+ channel
Mechanisms of Oxygen-Induced Contraction of Ductus Arteriosus Isolated From the Fetal Rabbit, 1218

K^+ channels
Heteromultimeric Assembly of Human Potassium Channels: Molecular Basis of a Transient Outward Current? 1326

Kidney
20-Hydroxyeicosatetraenoic Acid Is an Endogenous Vasoconstrictor of Canine Renal Arcuate Arteries, 126
Vascular Exchange in the Kidney: Regional Characterization by Multiple Indicator Tomography, 1172

Kinetics
Mechanism of cAMP-Dependent Modulation of Cardiac Sodium Channel Current Kinetics, 807

Kinins
Role of Kinins and Nitric Oxide in the Effects of Angiotensin Converting Enzyme Inhibitors on Neointima Formation, 1202

L

L-type calcium channels
Comparison of the Number of Dihydropyridine Receptors With the Number of Functional L-Type Calcium Channels in Embryonic Heart, 396

Lactate
Substrate-Induced Changes in the Lipid Content of Ischemic and Reperfused Myocardium: Its Relation to Hemodynamic Recovery, 176

Lanthanum
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035

Large mammals
Gene Injection Into Canine Myocardium as a Useful Model for Studying Gene Expression in the Heart of Large Mammals, 688

Left atrium
Altered Left Atrial Compliance After Atrial Appendectomy: Influence on Left Atrial and Ventricular Filling, 167

Left ventricular filling
Effect of Heart Failure on the Mechanism of Exercise-Induced Augmentation of Mitral Valve Flow, 795

Lipids
Substrate-Induced Changes in the Lipid Content of Ischemic and Reperfused Myocardium: Its Relation to Hemodynamic Recovery, 176

Lipopolysaccharide
Selective Inhibition of Endothelium-Dependent Vasodilator Capacity by *Escherichia coli* Endotoxemia, 539

Local anesthetic block
Selective Contribution of Two Types of Carotid Sinus Baroreceptors to the Control of Blood Pressure, 1011

Low density lipoprotein metabolism
Oral Contraceptive Treatment Decreases Arterial Low Density Lipoprotein Degradation in Female Cynomolgus Monkeys, 1300

Lung inflation
Respiratory Modulation of Muscle Sympathetic Nerve Activity in Intact and Lung Denervated Humans, 440

Lysolecithin
Effects of Lysolipids and Oxidatively Modified Low Density Lipoprotein on Endothelium-Dependent Relaxation of Rabbit Aorta, 161

Lysophosphatidylcholine
Effects of Lysolipids and Oxidatively Modified Low Density Lipoprotein on Endothelium-Dependent Relaxation of Rabbit Aorta, 161
High Density Lipoprotein Reverses Inhibitory Effect of Oxidized Low Density Lipoprotein on Endothelium-Dependent Arterial Relaxation, 1103

M

M cells
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671

Macropatch clamp
Mechanism of cAMP-Dependent Modulation of Cardiac Sodium Channel Current Kinetics, 807

Membrane permeability
Measurement of Na^+-K^+ Pump Current in Isolated Rabbit Ventricular Myocytes Using the Whole-Cell Voltage-Clamp Technique: Inhibition of the Pump by Oxidant Stress, 91

Mesenteric resistance arteries
Endothelium-Dependent Relaxation of Hypertensive Resistance Arteries Is Not Impaired Under All Conditions, 290

Methacholine
Endothelium-Dependent Contractions in Rabbit Pulmonary Artery Are Mediated by Thromboxane A_2, 1023

Mg^{2+}
Regulation of Magnesium Uptake and Release in the Heart and in Isolated Ventricular Myocytes, 1139

Microcirculation
Role of Shear Stress and Endothelial Prostaglandins in Flow- and Viscosity-Induced Dilation of Arterioles In Vitro, 1276

Midmyocardium
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671

Mini Review
Mechanical Stress Mechanisms and the Cell: An Endothelial Paradigm, 239
Molecular Basis of Permeation in Voltage-Gated Ion Channels, 491
Muscle-Specific Gene Expression: A Comparison of Cardiac and Skeletal Muscle Transcription Strategies, 925
Regulation of Muscle Transcription by the MyoD Family: The Heart of the Matter, 1

N^G-Monomethyl-L-arginine
Inhibition of Nitric Oxide Formation in the Nucleus Tractus Solitarius Increases Renal Sympathetic Nerve Activity in Rabbits, 511

Motility
Smooth and Skeletal Muscle Actin Are Mechanically Indistinguishable in the In Vitro Motility Assay, 219

Mouse chromosome 4
Structure, Expression, and Genomic Mapping of the Mouse Natriuretic Peptide Type-B Gene, 984
Mouse genetics
Structure, Expression, and Genomic Mapping of the Mouse Natriuretic Peptide Type-B Gene, 984
mRNA isoforms
Antithetical Accumulation of Myosin Heavy Chain but Not α-Actin mRNA Isoforms During Early Stages of Pressure-Overload–Induced Rat Cardiac Hypertrophy, 857
Multiple indicator tomography
Vascular Exchange in the Kidney: Regional Characterization by Multiple Indicator Tomography, 1172
Muscarinic K^+ channels
Platelet-Activating Factor Receptor–Dependent Activation of the Muscarinic K^+ Current in Bullfrog Atrial Myocytes, 786
Muscarinic receptors
Acetylcholine Reversal of Isoproterenol-Stimulated Sodium Currents in Rabbit Ventricular Myocytes, 517
N^G-Nitro L-Arginine Methyl Ester and Other Alkyl Esters of Arginine are Muscarinic Receptor Antagonists, 387
Muscle contraction
Contraction and Relaxation of Isolated Cardiac Myocytes of the Frog Under Varying Mechanical Loads, 297
Muscle relaxation
Contraction and Relaxation of Isolated Cardiac Myocytes of the Frog Under Varying Mechanical Loads, 297
Myocardial conduction
Distinct Patterns of Connexin Expression in Canine Purkinje Fibers and Ventricular Muscle, 1124
Myocardial contraction
Contraction and Relaxation of Isolated Cardiac Myocytes of the Frog Under Varying Mechanical Loads, 297
Myocardial infarction
Blockade of ATP-Sensitive Potassium Channels Increases Infarct Size but Does Not Prevent Preconditioning in Rabbit Hearts, 44
Myocardial ischemia
Inhibition of Gap Junctional Conductance by Long-Chain Acylcarnitines and Their Preferential Accumulation in Junctional Sarcolemma During Hypoxia, 879
Mechanism of Preconditioning: Ionic Alterations, 112
Platelets Protect Against Myocardial Dysfunction and Injury Induced by Ischemia and Reperfusion in Isolated Rat Hearts, 1181
Myocardial stimulation
Optical Measurements of Transmembrane Potential Changes During Electric Field Stimulation of Ventricular Cells, 255
Myocardial strain
Residual Strain in the Ventricle of the Stage 16–24 Chick Embryo, 455
Myocarditis
Myocardial Fibrin Deposition in Experimental Viral Myocarditis That Progresses to Dilated Cardiomyopathy, 914
Myocardium
Altered Calcium Sensitivity of Isometric Tension in Myocyte-Sized Preparations of Porcine Postischemic Stunned Myocardium, 50
Effect of Dysfunctional Vascular Endothelium on Myocardial Performance in Isolated Papillary Muscles, 768
Hypoxia Enhances Isoproterenol-Induced Increase in Heart Interstitial Adenosine, Depressing β-Adrenergic Contractile Responses, 571
Regional Myocardial Capillary Erythrocyte Transit Time in the Normal Resting Heart, 187
Selective A_2-Adenosine Receptor Agonists Do Not Alter Action Potential Duration, Twitch Shortening, or cAMP Accumulation in Guinea Pig, Rat, or Rabbit Isolated Ventricular Myocytes, 194
Myocyte growth
Regulation of Angiotensin II Receptors on Ventricular Myocytes After Myocardial Infarction in Rats, 1149
Myocytes
A_1-Adenosine Receptor–Mediated Inhibition of Isoproterenol-Stimulated Protein Phosphorylation in Ventricular Myocytes: Evidence Against a cAMP-Dependent Effect, 65

Regulation of Muscle Transcription by the MyoD Family: The Heart of the Matter, 1
Myogenic response
20-Hydroxyeicosatetraenoic Acid Is an Endogenous Vasoconstrictor of Canine Renal Arcuate Arteries, 126
Coronary Venular Responses to Flow and Pressure, 607
Myosin
Mechanical Properties of Rat Cardiac Skinned Fibers Are Altered by Chronic Growth Hormone Hypersecretion, 57
Myosin heavy chain
Antithetical Accumulation of Myosin Heavy Chain but Not α-Actin mRNA Isoforms During Early Stages of Pressure-Overload–Induced Rat Cardiac Hypertrophy, 857
Gene Injection Into Canine Myocardium as a Useful Model for Studying Gene Expression in the Heart of Large Mammals, 688
Myosin light chain phosphorylation
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308
Mechanisms of Signal Transduction During α_2-Adrenergic Receptor–Mediated Contraction of Vascular Smooth Muscle, 778
Myristoylation
Mutation of *N*-Myristoylation Site Converts Endothelial Cell Nitric Oxide Synthase From a Membrane to a Cytosolic Protein, 921

N

Na-Ca exchange
The Effect of Exchanger Inhibitory Peptide (XIP) on Sodium–Calcium Exchange Current in Guinea Pig Ventricular Cells, 497
Na^+-Ca^{2+} exchange
Alterations in Electrical Activity and Membrane Currents Induced by Intracellular Oxygen-Derived Free Radical Stress in Guinea Pig Ventricular Myocytes, 1229
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Na^+-H^+ exchange
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Na^+-K^+-Cl^- cotransport
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Na^+-K^+ pump
Measurement of Na^+-K^+ Pump Current in Isolated Rabbit Ventricular Myocytes Using the Whole-Cell Voltage-Clamp Technique: Inhibition of the Pump by Oxidant Stress, 91
Natriuresis
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Natriuretic peptides
Structure, Expression, and Genomic Mapping of the Mouse Natriuretic Peptide Type-B Gene, 984
Needle-probe videomicroscope
In Vivo Observation of Subendocardial Microvessels of the Beating Porcine Heart Using a Needle-Probe Videomicroscope With a CCD Camera, 939

Negative inotrope
Platelet-Activating Factor Receptor–Dependent Activation of the Muscarinic K^+ Current in Bullfrog Atrial Myocytes, 786
Neointima
Role of Kinins and Nitric Oxide in the Effects of Angiotensin Converting Enzyme Inhibitors on Neointima Formation, 1202
Neuropeptide Y
Effects of Intense Antecedent Sympathetic Stimulation on Sympathetic Neurotransmission in the Heart, 137
Intense Sympathetic Stimulation Releases Neuropeptide Y but Fails to Evoke Sustained Coronary Vasoconstriction in Dogs, 816
Newborn lambs
Inhaled Nitric Oxide Reverses Pulmonary Vasoconstriction in the Hypoxic and Acidotic Newborn Lamb, 246
Nicotine
Impairment by Damage of the Pterygopalatine Ganglion of Nitroxidergic Vasodilator Nerve Function in Canine Cerebral and Retinal Arteries, 206
Nitric oxide
Coronary Venular Responses to Flow and Pressure, 607
Inhaled Nitric Oxide Reverses Pulmonary Vasoconstriction in the Hypoxic and Acidotic Newborn Lamb, 246
Inhibition of Nitric Oxide Formation in the Nucleus Tractus Solitarius Increases Renal Sympathetic Nerve Activity in Rabbits, 511
Mutation of *N*-Myristoylation Site Converts Endothelial Cell Nitric Oxide Synthase From a Membrane to a Cytosolic Protein, 921
N^G-Nitro L-Arginine Methyl Ester and Other Alkyl Esters of Arginine are Muscarinic Receptor Antagonists, 387
Nitric oxide synthase
Mutation of *N*-Myristoylation Site Converts Endothelial Cell Nitric Oxide Synthase From a Membrane to a Cytosolic Protein, 921
Selective Inhibition of Endothelium-Dependent Vasodilator Capacity by *Escherichia coli* Endotoxemia, 539
Nitric oxide synthase inhibitors
N^G-Nitro L-Arginine Methyl Ester and Other Alkyl Esters of Arginine are Muscarinic Receptor Antagonists, 387
N^G-Nitro L-arginine methyl ester
Diminished Basal Nitric Oxide Release After Myocardial Ischemia and Reperfusion Promotes Neutrophil Adherence to Coronary Endothelium, 403
N^G-Nitro L-Arginine Methyl Ester and Other Alkyl Esters of Arginine are Muscarinic Receptor Antagonists, 387
N^G-Nitro-L-arginine
Nitric Oxide Mediates Vasodilatation in Response to Activation of *N*-Methyl-D-Aspartate Receptors in Brain, 476
Nitroprusside
Nitric Oxide Mediates Vasodilatation in Response to Activation of *N*-Methyl-D-Aspartate Receptors in Brain, 476
Nitroxidergic nerve
Impairment by Damage of the Pterygopalatine Ganglion of Nitroxidergic Vasodilator Nerve Function in Canine Cerebral and Retinal Arteries, 206
NMDA
Nitric Oxide Mediates Vasodilatation in Response to Activation of *N*-Methyl-D-Aspartate Receptors in Brain, 476
Nonselective cation current
Alterations in Electrical Activity and Membrane Currents Induced by Intracellular Oxygen-Derived Free Radical Stress in Guinea Pig Ventricular Myocytes, 1229
Noradrenaline
Regulation of Diacylglycerol Metabolism by Vasoconstrictor Hormones in Intact Small Arteries, 1163
Norepinephrine
Endothelium-Dependent Relaxation of Hypertensive Resistance Arteries Is Not Impaired Under All Conditions, 290
Extracellular Ca^{2+}-Dependent Potentiation by Cocaine of Serotonin- and Norepinephrine-Induced Contractions in Rat Vascular Smooth Muscle, 1191
Intense Sympathetic Stimulation Releases Neuropeptide Y but Fails to Evoke Sustained Coronary Vasoconstriction in Dogs, 816
Nuclear magnetic resonance
Mechanism of Preconditioning: Ionic Alterations, 112
Nuclear magnetic resonance spectroscopy
Mechanisms of pH_i Recovery After Global Ischemia in the Perfused Heart, 993
Nucleus of the solitary tract
Endothelin as a Neuropeptide: Cardiovascular Effects in the Brainstem of Normotensive Rats, 20
Nucleus tractus solitarius
Inhibition of Nitric Oxide Formation in the Nucleus Tractus Solitarius Increases Renal Sympathetic Nerve Activity in Rabbits, 511

O

O_2 consumption
Hypoxia Enhances Isoproterenol-Induced Increase in Heart Interstitial Adenosine, Depressing β-Adrenergic Contractile Responses, 571
O_2-induced contraction
Mechanisms of Oxygen-Induced Contraction of Ductus Arteriosus Isolated From the Fetal Rabbit, 1218
O_2 supply-to-demand ratio
Hypoxia Enhances Isoproterenol-Induced Increase in Heart Interstitial Adenosine, Depressing β-Adrenergic Contractile Responses, 571
Oral contraceptives
Oral Contraceptive Treatment Decreases Arterial Low Density Lipoprotein Degradation in Female Cynomolgus Monkeys, 1300
Org 30029
Effects of the Positive Inotropic Agent Org 30029 on Developed Force and Aequorin Light Transients in Intact Canine Ventricular Myocardium, 597
Ouabain
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Oxidant stress
Measurement of Na^+-K^+ Pump Current in Isolated Rabbit Ventricular Myocytes Using the Whole-Cell Voltage-Clamp Technique: Inhibition of the Pump by Oxidant Stress, 91
Oxidatively modified low density lipoprotein
Effects of Lysolipids and Oxidatively Modified Low Density Lipoprotein on Endothelium-Dependent Relaxation of Rabbit Aorta, 161
Oxidized lipoprotein
XeCl Laser–Induced Fluorescence of Atherosclerotic Arteries: Spectral Similarities Between Lipid-Rich Lesions and Peroxidized Lipoproteins, 84
Oxidized low density lipoprotein
High Density Lipoprotein Reverses Inhibitory Effect of Oxidized Low Density Lipoprotein on Endothelium-Dependent Arterial Relaxation, 1103
Oxygen-derived free radicals
Activation of Ischemia- and Reperfusion-Sensitive Abdominal Visceral C Fiber Afferents: Role of Hydrogen Peroxide and Hydroxyl Radicals, 1266
Alterations in Electrical Activity and Membrane Currents Induced by Intracellular Oxygen-Derived Free Radical Stress in Guinea Pig Ventricular Myocytes, 1229
Oxygen radicals
Physiological pH: Effects on Posthypoxic Proximal Tubular Injury, 837
Oxygen transport
Regional Myocardial Capillary Erythrocyte Transit Time in the Normal Resting Heart, 187

P

Pacemaker current
Pacemaker Current Exists in Ventricular Myocytes, 232
Pacing current
Pacemaker Current Exists in Ventricular Myocytes, 232

[1-^{11}C]Palmitic acid
Recovery of Regional Contractile Function and Oxidative Metabolism in Stunned Myocardium Induced by 1-Hour Circumflex Coronary Artery Stenosis in Chronically Instrumented Dogs, 901

Parasympathetic nerves
Parasympathetic Cerebrovasodilator Center of the Facial Nerve, 470

Patch clamp
Background Potassium Current Active During the Plateau of the Action Potential in Guinea Pig Ventricular Myocytes, 890
Dual Effect of Thrombin on Voltage-Dependent Ca^{2+} Channels of Portal Vein Smooth Muscle Cells, 1317

pH_i
Mechanisms of pH_i Recovery After Global Ischemia in the Perfused Heart, 993

Phenylephrine
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308

Phorbol esters
Characterization of Protein Kinase C Isotype Expression in Adult Rat Heart: Protein Kinase C-ϵ Is a Major Isotype Present, and It Is Activated by Phorbol Esters, Epinephrine, and Endothelin, 757
Regulation of Insulin-Like Growth Factor I Receptors on Vascular Smooth Muscle Cells by Growth Factors and Phorbol Esters, 1285

Phosphatase
Mechanisms of Ca^{2+}-Independent Contraction in Single Permeabilized Ferret Aorta Cells, 651

Phosphatidylinositide-specific phospholipase C
Phosphatidylinositol Metabolism in Hypertrophic Rat Heart, 966

Phosphoinositol turnover
Regulation of Angiotensin II Receptors on Ventricular Myocytes After Myocardial Infarction in Rats, 1149

Phospholamban
Alterations in Sarcoplasmic Reticulum Gene Expression in Human Heart Failure: A Possible Mechanism for Alterations in Systolic and Diastolic Properties of the Failing Myocardium, 463

Phospholipase
Physiological pH: Effects on Posthypoxic Proximal Tubular Injury, 837

Phospholipase A_2
Effects of Lysolipids and Oxidatively Modified Low Density Lipoprotein on Endothelium-Dependent Relaxation of Rabbit Aorta, 161

Phospholipase B
Effects of Lysolipids and Oxidatively Modified Low Density Lipoprotein on Endothelium-Dependent Relaxation of Rabbit Aorta, 161

Phospholipase C
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308

Phospholipase D
Phosphatidic Acid Stimulates Inositol 1,4,5-Trisphosphate Production in Adult Cardiac Myocytes, 701

Phosphorylation
A_1-Adenosine Receptor–Mediated Inhibition of Isoproterenol-Stimulated Protein Phosphorylation in Ventricular Myocytes: Evidence Against a cAMP-Dependent Effect, 65

Pigs
Coronary Venular Responses to Flow and Pressure, 607

Pinacidil
Blockade of ATP-Sensitive Potassium Channels Increases Infarct Size but Does Not Prevent Preconditioning in Rabbit Hearts, 44
Mechanosensitive Gating of Atrial ATP-Sensitive Potassium Channels, 973

Plasminogen activator inhibitor-1
Induction of Vascular Smooth Muscle Cell Expression of Plasminogen Activator Inhibitor-1 by Thrombin, 36

Platelet-activating factor
Platelet-Activating Factor Receptor–Dependent Activation of the Muscarinic K^+ Current in Bullfrog Atrial Myocytes, 786
Role of Platelet-Activating Factor in Hypotension and Platelet Activation Induced by Infusion of Thrombolytic Agents in Rabbits, 658

Platelet-derived growth factor
Regulation of Ca^{2+} Transport by Platelet-Derived Growth Factor-BB in Rat Vascular Smooth Muscle Cells, 847
Regulation of Insulin-Like Growth Factor I Receptors on Vascular Smooth Muscle Cells by Growth Factors and Phorbol Esters, 1285

Platelet-induced contraction
Hypoxia Causes an Abnormal Contractile Response in the Atherosclerotic Rabbit Aorta: Implication of Reduced Nitric Oxide and cGMP Production, 616

Platelets
Altered Vascular Responses to Platelets From Hypercholesterolemic Humans, 737
Platelets Protect Against Myocardial Dysfunction and Injury Induced by Ischemia and Reperfusion in Isolated Rat Hearts, 1181
Role of Platelet-Activating Factor in Hypotension and Platelet Activation Induced by Infusion of Thrombolytic Agents in Rabbits, 658

Polymorphonuclear leukocytes
Diminished Basal Nitric Oxide Release After Myocardial Ischemia and Reperfusion Promotes Neutrophil Adherence to Coronary Endothelium, 403

Positive inotropic effect
Effects of the Positive Inotropic Agent Org 30029 on Developed Force and Aequorin Light Transients in Intact Canine Ventricular Myocardium, 597

Positron emission tomography
Recovery of Regional Contractile Function and Oxidative Metabolism in Stunned Myocardium Induced by 1-Hour Circumflex Coronary Artery Stenosis in Chronically Instrumented Dogs, 901

Postganglionic fibers
Parasympathetic Cerebrovasodilator Center of the Facial Nerve, 470

Potassium
Optical Measurements of Transmembrane Potential Changes During Electric Field Stimulation of Ventricular Cells, 255

Potassium channel openers
Mechanosensitive Gating of Atrial ATP-Sensitive Potassium Channels, 973

Potassium channels
20-Hydroxyeicosatetraenoic Acid Is an Endogenous Vasoconstrictor of Canine Renal Arcuate Arteries, 126
Background Potassium Current Active During the Plateau of the Action Potential in Guinea Pig Ventricular Myocytes, 890

Preconditioning
Mechanism of Preconditioning: Ionic Alterations, 112

Pressor systems
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255

Pressure
Novel Cation-Selective Mechanosensitive Ion Channel in the Atrial Cell Membrane, 225

Proliferation
Regulation of Ca^{2+} Transport by Platelet-Derived Growth Factor-BB in Rat Vascular Smooth Muscle Cells, 847

Prostacyclin
Endothelium-Dependent Contractions in Rabbit Pulmonary Artery Are Mediated by Thromboxane A_2, 1023

Prostaglandin $F_{2\alpha}$
Mechanisms of Ca^{2+}-Independent Contraction in Single Permeabilized Ferret Aorta Cells, 651

Protease inhibitors
Effects of Thiol Protease Inhibitors on Cell Cycle and Proliferation of Vascular Smooth Muscle Cells in Culture, 413
Protein
A_1-Adenosine Receptor–Mediated Inhibition of Isoproterenol-Stimulated Protein Phosphorylation in Ventricular Myocytes: Evidence Against a cAMP-Dependent Effect, 65
Protein isoform
Smooth and Skeletal Muscle Actin Are Mechanically Indistinguishable in the In Vitro Motility Assay, 219
Protein kinase C
Characterization of Protein Kinase C Isotype Expression in Adult Rat Heart: Protein Kinase C-ϵ Is a Major Isotype Present, and It Is Activated by Phorbol Esters, Epinephrine, and Endothelin, 757
Mechanisms of Ca^{2+}-Independent Contraction in Single Permeabilized Ferret Aorta Cells, 651
Phosphatidic Acid Stimulates Inositol 1,4,5-Trisphosphate Production in Adult Cardiac Myocytes, 701
Protein kinase C-ϵ
Characterization of Protein Kinase C Isotype Expression in Adult Rat Heart: Protein Kinase C-ϵ Is a Major Isotype Present, and It Is Activated by Phorbol Esters, Epinephrine, and Endothelin, 757
Protein phosphorylation
Age-Related Alterations in the Phosphorylation of Sarcoplasmic Reticulum and Myofibrillar Proteins and Diminished Contractile Response to Isoproterenol in Intact Rat Ventricle, 102
Pterygopalatine ganglion
Impairment by Damage of the Pterygopalatine Ganglion of Nitroxidergic Vasodilator Nerve Function in Canine Cerebral and Retinal Arteries, 206
Pulmonary circulation
Inhaled Nitric Oxide Reverses Pulmonary Vasoconstriction in the Hypoxic and Acidotic Newborn Lamb, 246
Pulmonary conus
Computer Simulations of Three-Dimensional Propagation in Ventricular Myocardium: Effects of Intramural Fiber Rotation and Inhomogeneous Conductivity on Epicardial Activation, 744
Pulmonary hypertension
Fetal Ductus Arteriosus Ligation: Pulmonary Vascular Smooth Muscle Biochemical and Mechanical Changes, 588
Pulmonary stretch reflexes
Respiratory Modulation of Muscle Sympathetic Nerve Activity in Intact and Lung Denervated Humans, 440
Pulmonary venous flow
Altered Left Atrial Compliance After Atrial Appendectomy: Influence on Left Atrial and Ventricular Filling, 167
Pyruvate
Substrate-Induced Changes in the Lipid Content of Ischemic and Reperfused Myocardium: Its Relation to Hemodynamic Recovery, 176

R

Rabbit renal artery
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308
Rabbit ventricular myocytes
Intracellular H^+ and Ca^{2+} Modulation of Trypsin-Modified ATP-Sensitive K^+ Channels in Rabbit Ventricular Myocytes, 715
Single Delayed Rectifier Channels in the Membrane of Rabbit Ventricular Myocytes, 865
Rabbits
Inhibition of Nitric Oxide Formation in the Nucleus Tractus Solitarius Increases Renal Sympathetic Nerve Activity in Rabbits, 511
Radioligand binding
N^G-Nitro L-Arginine Methyl Ester and Other Alkyl Esters of Arginine are Muscarinic Receptor Antagonists, 387
Radioligands
Identification of a Specific Radioligand for the Cardiac Rapidly Activating Delayed Rectifier K^+ Channel, 707
Rat aortas
Age-Related Changes in Sarcoplasmic Reticulum Ca^{2+}-ATPase and α-Smooth Muscle Actin Gene Expression in Aortas of Normotensive and Spontaneously Hypertensive Rats, 341
Rat cremaster muscle
Role of Shear Stress and Endothelial Prostaglandins in Flow- and Viscosity-Induced Dilation of Arterioles In Vitro, 1276
Rat heart
Isoprenaline Stimulates Gene Transcription of the Inhibitory G Protein α-Subunit $G_{i\alpha\text{-}2}$ in Rat Heart, 696
Rats
Antithetical Accumulation of Myosin Heavy Chain but Not α-Actin mRNA Isoforms During Early Stages of Pressure-Overload–Induced Rat Cardiac Hypertrophy, 857
Receptor
Identification of Functional PGH_2/TxA_2 Receptors on Human Endothelial Cells, 958
Regulation of the Endothelial Cell Urokinase-Type Plasminogen Activator Receptor: Evidence for Cyclic AMP–Dependent and Protein Kinase C–Dependent Pathways, 330
Receptors
Heterogeneity of ATP Receptors in Aortic Endothelial Cells: Involvement of P_{2y} and P_{2u} Receptors in Inositol Phosphate Response, 504
Receptors, purinergic
Selective A_2-Adenosine Receptor Agonists Do Not Alter Action Potential Duration, Twitch Shortening, or cAMP Accumulation in Guinea Pig, Rat, or Rabbit Isolated Ventricular Myocytes, 194
Recovery from inactivation
Ca^{2+} Channel Kinetics in Acutely Isolated Fetal, Neonatal, and Adult Rabbit Cardiac Myocytes, 1065
Reentry
Spiral Waves of Excitation Underlie Reentrant Activity in Isolated Cardiac Muscle, 631
Regulation
Antithetical Accumulation of Myosin Heavy Chain but Not α-Actin mRNA Isoforms During Early Stages of Pressure-Overload–Induced Rat Cardiac Hypertrophy, 857
Relaxation
Endothelium-Dependent Relaxation of Hypertensive Resistance Arteries Is Not Impaired Under All Conditions, 290
Renal denervation
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Renal nerve
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Renal sympathetic nerve activity
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255
Renin-angiotensin system
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255
Reoxygenation
Direct Detection of Endogenous Hydroxyl Radical Production in Cultured Adult Cardiomyocytes During Anoxia and Reoxygenation: Is the Hydroxyl Radical Really the Most Damaging Radical Species? 725
Reperfusion
Mechanisms of pH_i Recovery After Global Ischemia in the Perfused Heart, 993
Substrate-Induced Changes in the Lipid Content of Ischemic and Reperfused Myocardium: Its Relation to Hemodynamic Recovery, 176
Reperfusion arrhythmias
Measurement of Na^+-K^+ Pump Current in Isolated Rabbit Ventricular Myocytes Using the Whole-Cell Voltage-Clamp Technique: Inhibition of the Pump by Oxidant Stress, 91

Reperfusion injury
Physiological pH: Effects on Posthypoxic Proximal Tubular Injury, 837
Respiration
Endothelin as a Neuropeptide: Cardiovascular Effects in the Brainstem of Normotensive Rats, 20
Retinal artery
Impairment by Damage of the Pterygopalatine Ganglion of Nitroxidergic Vasodilator Nerve Function in Canine Cerebral and Retinal Arteries, 206
Rostroventrolateral medulla
Endothelin as a Neuropeptide: Cardiovascular Effects in the Brainstem of Normotensive Rats, 20
Ryanodine
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Ryanodine receptor
Alterations in Sarcoplasmic Reticulum Gene Expression in Human Heart Failure: A Possible Mechanism for Alterations in Systolic and Diastolic Properties of the Failing Myocardium, 463
Ryanodine receptors
Anti–Ryanodine Receptor Antibody Binding Sites in Vascular and Endocardial Endothelium, 481

S

Salicylate
Direct Detection of Endogenous Hydroxyl Radical Production in Cultured Adult Cardiomyocytes During Anoxia and Reoxygenation: Is the Hydroxyl Radical Really the Most Damaging Radical Species? 725
Salt
Hepatorenal Reflex Plays an Important Role in Natriuresis After High-NaCl Food Intake in Conscious Dogs, 552
Sarcolemma
Dystrophin-Glycoprotein Complex and Laminin Colocalize to the Sarcolemma and Transverse Tubules of Cardiac Muscle, 349
Sarcoplasmic reticulum
Alterations in Sarcoplasmic Reticulum Gene Expression in Human Heart Failure: A Possible Mechanism for Alterations in Systolic and Diastolic Properties of the Failing Myocardium, 463
Ouabain: A Stimulator of Atrial Natriuretic Peptide Secretion and Its Mechanism of Action, 1035
Sarcoplasmic reticulum Ca^{2+}-ATPase
Age-Related Changes in Sarcoplasmic Reticulum Ca^{2+}-ATPase and α-Smooth Muscle Actin Gene Expression in Aortas of Normotensive and Spontaneously Hypertensive Rats, 341
Serotonin
Altered Vascular Responses to Platelets From Hypercholesterolemic Humans, 737
Extracellular Ca^{2+}-Dependent Potentiation by Cocaine of Serotonin- and Norepinephrine-Induced Contractions in Rat Vascular Smooth Muscle, 1191
Platelets Protect Against Myocardial Dysfunction and Injury Induced by Ischemia and Reperfusion in Isolated Rat Hearts, 1181
Shear stress
Flow-Related Responses of Intracellular Inositol Phosphate Levels in Cultured Aortic Endothelial Cells, 827
Shock waveform
Epicardial Mapping of Ventricular Defibrillation With Monophasic and Biphasic Shocks in Dogs, 145
Signal transduction
Flow-Related Responses of Intracellular Inositol Phosphate Levels in Cultured Aortic Endothelial Cells, 827
Single channels
Single Delayed Rectifier Channels in the Membrane of Rabbit Ventricular Myocytes, 865
Sinoaortic denervation
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255
Site-directed mutagenesis
Mutation of *N*-Myristoylation Site Converts Endothelial Cell Nitric Oxide Synthase From a Membrane to a Cytosolic Protein, 921
Skeletal muscle
Muscle-Specific Gene Expression: A Comparison of Cardiac and Skeletal Muscle Transcription Strategies, 925
Regulation of Muscle Transcription by the MyoD Family: The Heart of the Matter, 1
Skinned fibers
Mechanical Properties of Rat Cardiac Skinned Fibers Are Altered by Chronic Growth Hormone Hypersecretion, 57
Smooth muscle
Effects of Thiol Protease Inhibitors on Cell Cycle and Proliferation of Vascular Smooth Muscle Cells in Culture, 413
N^G-Nitro L-Arginine Methyl Ester and Other Alkyl Esters of Arginine are Muscarinic Receptor Antagonists, 387
Smooth and Skeletal Muscle Actin Are Mechanically Indistinguishable in the In Vitro Motility Assay, 219
α-Smooth muscle actin
Age-Related Changes in Sarcoplasmic Reticulum Ca^{2+}-ATPase and α-Smooth Muscle Actin Gene Expression in Aortas of Normotensive and Spontaneously Hypertensive Rats, 341
Smooth muscle cells
Induction of Vascular Smooth Muscle Cell Expression of Plasminogen Activator Inhibitor-1 by Thrombin, 36
Sodium channel
Mechanism of cAMP-Dependent Modulation of Cardiac Sodium Channel Current Kinetics, 807
Sodium channels
Acetylcholine Reversal of Isoproterenol-Stimulated Sodium Currents in Rabbit Ventricular Myocytes, 517
In Vivo Estimation of Cardiac Transmembrane Current, 424
Molecular Basis of Permeation in Voltage-Gated Ion Channels, 491
Somatomedins
Abdominal Coarctation Increases Insulin-Like Growth Factor I mRNA Levels in Rat Aorta, 271
Spontaneously hypertensive rats
Endothelium-Dependent Relaxation of Hypertensive Resistance Arteries Is Not Impaired Under All Conditions, 290
Streptokinase
Comparison of Hirudin and Heparin as Adjuncts to Streptokinase Thrombolysis in a Canine Model of Coronary Thrombosis, 1091
Role of Platelet-Activating Factor in Hypotension and Platelet Activation Induced by Infusion of Thrombolytic Agents in Rabbits, 658
Stretch-activated channels
Mechanosensitive Gating of Atrial ATP-Sensitive Potassium Channels, 973
Subendocardial microcirculation
In Vivo Observation of Subendocardial Microvessels of the Beating Porcine Heart Using a Needle-Probe Videomicroscope With a CCD Camera, 939
Subepicardial venules
Coronary Venular Responses to Flow and Pressure, 607
Sublethal ischemia
Delayed Effects of Sublethal Ischemia on the Acquisition of Tolerance to Ischemia, 1293
β Subunits
Molecular Cloning of Three Isoforms of the L-Type Voltage-Dependent Calcium Channel β Subunit From Normal Human Heart, 1337
Sulfonylureas
Dissociation Between Cellular K^+ Loss, Reduction in Repolarization Time, and Tissue ATP Levels During Myocardial Hypoxia and Ischemia, 560
Superficial temporal artery
Impairment by Damage of the Pterygopalatine Ganglion of Nitroxidergic Vasodilator Nerve Function in Canine Cerebral and Retinal Arteries, 206

Superior salivatory nucleus
Parasympathetic Cerebrovasodilator Center of the Facial Nerve, 470
Supravalvular aortic stenosis
Coronary Pressure–Flow Relation in Left Ventricular Hypertrophy: Importance of Changes in Back Pressure Versus Changes in Minimum Resistance, 579
Sympathetic nerve activity
Inhibition of Nitric Oxide Formation in the Nucleus Tractus Solitarius Increases Renal Sympathetic Nerve Activity in Rabbits, 511
Sympathetic nervous system
Central and Peripheral Vasopressin Interact Differently With Sympathetic Nervous System and Renin-Angiotensin System in Renal Hypertensive Rabbits, 1255

T

Tension
Altered Calcium Sensitivity of Isometric Tension in Myocyte-Sized Preparations of Porcine Postischemic Stunned Myocardium, 50
Thrombin
Dual Effect of Thrombin on Voltage-Dependent Ca^{2+} Channels of Portal Vein Smooth Muscle Cells, 1317
Induction of Vascular Smooth Muscle Cell Expression of Plasminogen Activator Inhibitor-1 by Thrombin, 36
Thrombin inhibition
Comparison of Hirudin and Heparin as Adjuncts to Streptokinase Thrombolysis in a Canine Model of Coronary Thrombosis, 1091
Thrombolysis
Comparison of Hirudin and Heparin as Adjuncts to Streptokinase Thrombolysis in a Canine Model of Coronary Thrombosis, 1091
Thrombosis
Comparison of Hirudin and Heparin as Adjuncts to Streptokinase Thrombolysis in a Canine Model of Coronary Thrombosis, 1091
Thromboxane
Altered Vascular Responses to Platelets From Hypercholesterolemic Humans, 737
Platelets Protect Against Myocardial Dysfunction and Injury Induced by Ischemia and Reperfusion in Isolated Rat Hearts, 1181
Thromboxane A_2
Identification of Functional PGH_2/TxA_2 Receptors on Human Endothelial Cells, 958
Thromboxane synthase
Endothelium-Dependent Contractions in Rabbit Pulmonary Artery Are Mediated by Thromboxane A_2, 1023
Thyroid hormone
Distinct Behavior of Cardiac Myosin Heavy Chain Gene Constructs In Vivo: Discordance With In Vitro Results, 1211
Thyroid hormone response element
Distinct Behavior of Cardiac Myosin Heavy Chain Gene Constructs In Vivo: Discordance With In Vitro Results, 1211
Tissue factor
Tissue Factor Is Expressed on Monocytes During Simulated Extracorporeal Circulation, 1075
Tissue-type plasminogen activators
Role of Platelet-Activating Factor in Hypotension and Platelet Activation Induced by Infusion of Thrombolytic Agents in Rabbits, 658
Tolbutamide
Mechanosensitive Gating of Atrial ATP-Sensitive Potassium Channels, 973
Torsade de pointes
Spiral Waves of Excitation Underlie Reentrant Activity in Isolated Cardiac Muscle, 631
Transcytosis
Increased Capillary Permeability to Albumin in Diabetic Rat Myocardium, 947
Transforming growth factor-β_1
Induction of Vascular Smooth Muscle Cell Expression of Plasminogen Activator Inhibitor-1 by Thrombin, 36
Transient outward current
Heteromultimeric Assembly of Human Potassium Channels: Molecular Basis of a Transient Outward Current? 1326
Transient outward currents
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671
Transmembrane action potentials
Optical Measurements of Transmembrane Potential Changes During Electric Field Stimulation of Ventricular Cells, 255
Transmembrane current
In Vivo Estimation of Cardiac Transmembrane Current, 424
Transverse tubules
Dystrophin-Glycoprotein Complex and Laminin Colocalize to the Sarcolemma and Transverse Tubules of Cardiac Muscle, 349
Troponin
Troponin I Gene Expression During Human Cardiac Development and in End-Stage Heart Failure, 932
Trypsin
Intracellular H^+ and Ca^{2+} Modulation of Trypsin-Modified ATP-Sensitive K^+ Channels in Rabbit Ventricular Myocytes, 715
Tubulin
Reperfusion After Brief Ischemia Disrupts the Microtubule Network in Canine Hearts, 361

U

UK-68,798
Rate-Dependent Prolongation of Cardiac Action Potentials by a Methanesulfonanilide Class III Antiarrhythmic Agent: Specific Block of Rapidly Activating Delayed Rectifier K^+ Current by Dofetilide, 75
Urokinase
Regulation of the Endothelial Cell Urokinase-Type Plasminogen Activator Receptor: Evidence for Cyclic AMP–Dependent and Protein Kinase C–Dependent Pathways, 330

V

Vagal afferents
Respiratory Modulation of Muscle Sympathetic Nerve Activity in Intact and Lung Denervated Humans, 440
Vascular endothelium
Effect of Dysfunctional Vascular Endothelium on Myocardial Performance in Isolated Papillary Muscles, 768
Vascular exchange
Vascular Exchange in the Kidney: Regional Characterization by Multiple Indicator Tomography, 1172
Vascular failure
Alteration of Reactivity of Native Arteries Induced by Venous Graft Placement, 319
Vascular smooth muscle
20-Hydroxyeicosatetraenoic Acid Is an Endogenous Vasoconstrictor of Canine Renal Arcuate Arteries, 126
Extracellular Ca^{2+}-Dependent Potentiation by Cocaine of Serotonin- and Norepinephrine-Induced Contractions in Rat Vascular Smooth Muscle, 1191
High α_1-Adrenoceptor Occupancy Decreases Relaxing Potency of Nifedipine by Increasing Myosin Light Chain Phosphorylation, 1308
Mechanisms of Ca^{2+}-Independent Contraction in Single Permeabilized Ferret Aorta Cells, 651
Mechanisms of Signal Transduction During α_2-Adrenergic Receptor–Mediated Contraction of Vascular Smooth Muscle, 778
Regulation of Ca^{2+} Transport by Platelet-Derived Growth Factor-BB in Rat Vascular Smooth Muscle Cells, 847
Selective Inhibition of Endothelium-Dependent Vasodilator Capacity by *Escherichia coli* Endotoxemia, 539

Vascular smooth muscle cells
Dual Effect of Thrombin on Voltage-Dependent Ca^{2+} Channels of Portal Vein Smooth Muscle Cells, 1317
Regulation of Insulin-Like Growth Factor I Receptors on Vascular Smooth Muscle Cells by Growth Factors and Phorbol Esters, 1285
Vasculopathy
Induction of Vascular Smooth Muscle Cell Expression of Plasminogen Activator Inhibitor-1 by Thrombin, 36
Vasopressin
Endothelium-Dependent Relaxation of Hypertensive Resistance Arteries Is Not Impaired Under All Conditions, 290
Vein grafts
Natural Course of Endothelium-Dependent and -Independent Responses in Autogenous Femoral Veins Grafted Into the Arterial Circulation of the Dog, 1004
Venous grafts
Alteration of Reactivity of Native Arteries Induced by Venous Graft Placement, 319
Ventricular loading
Regulation of Angiotensin II Receptors on Ventricular Myocytes After Myocardial Infarction in Rats, 1149
Ventricular myocardium
Effects of the Positive Inotropic Agent Org 30029 on Developed Force and Aequorin Light Transients in Intact Canine Ventricular Myocardium, 597
Ionic Bases for Electrophysiological Distinctions Among Epicardial, Midmyocardial, and Endocardial Myocytes From the Free Wall of the Canine Left Ventricle, 671
Ventricular myocyte
Pacemaker Current Exists in Ventricular Myocytes, 232
Ventricular myocytes
Alterations in Electrical Activity and Membrane Currents Induced by Intracellular Oxygen-Derived Free Radical Stress in Guinea Pig Ventricular Myocytes, 1229
Optical Measurements of Transmembrane Potential Changes During Electric Field Stimulation of Ventricular Cells, 255
Ventricular tachycardia
Spiral Waves of Excitation Underlie Reentrant Activity in Isolated Cardiac Muscle, 631
Viscosity
Role of Shear Stress and Endothelial Prostaglandins in Flow- and Viscosity-Induced Dilation of Arterioles In Vitro, 1276
Voltage clamp
Measurement of Na^+-K^+ Pump Current in Isolated Rabbit Ventricular Myocytes Using the Whole-Cell Voltage-Clamp Technique: Inhibition of the Pump by Oxidant Stress, 91
Voltage-sensitive fluorescent dye
Optical Measurements of Transmembrane Potential Changes During Electric Field Stimulation of Ventricular Cells, 255
Volume overload
Effects of Chronic Mitral Regurgitation on Diastolic Function in Isolated Cardiocytes, 1110

W

Wall thickening
Recovery of Regional Contractile Function and Oxidative Metabolism in Stunned Myocardium Induced by 1-Hour Circumflex Coronary Artery Stenosis in Chronically Instrumented Dogs, 901
Whole-cell patch clamp
Alterations in Electrical Activity and Membrane Currents Induced by Intracellular Oxygen-Derived Free Radical Stress in Guinea Pig Ventricular Myocytes, 1229
Window current
Ca^{2+} Channel Kinetics in Acutely Isolated Fetal, Neonatal, and Adult Rabbit Cardiac Myocytes, 1065
Wistar-Kyoto rats
Endothelium-Dependent Relaxation of Hypertensive Resistance Arteries Is Not Impaired Under All Conditions, 290

X

XeCl laser
XeCl Laser–Induced Fluorescence of Atherosclerotic Arteries: Spectral Similarities Between Lipid-Rich Lesions and Peroxidized Lipoproteins, 84
